Balance, Purple mask, Lucid dreaming, Sun rituals and The Eye Marrying Maiden are part of a long term project dedicated to my passion for folklore, symbols and the spiritual side of life.
I come from a background with eclectic influences. With my roots, coming deep from a land of pagan rituals, dark stories and mesmerizing traditions, naturally my main source of inspiration always has been the magical power of folklore, myths, legends and fairy tales. The core of my work is inspired by the human feelings, perceptions and understandings of life. Sources of inspiration are also the

art of music, quantum physics theories, archaeology, new age philosophy and my dreams. My work is about symbolic meanings, the connections between visible and invisible worlds, between good and evil, fears and hopes, between life and death. My work tells a story about the ancient and the urban, leads you on a path between the real and unreal. This is a story about the Gods and the Humans. My images are based on factual and imaginary rituals and wear masks of lucid dreaming and superstitions. Are we awake or we are sleep walking in this life?
